Sustainable perspectives

For flexible room structures
For durable office furnishing
For sustainable architecture

Strähle
Raum-Systeme

Strähle:
Sustainable utilisation

Flexible room structure
Long-lasting product quality
Healthy use

Partition systems by Strähle
combining and dividing
opening and closing
protecting and preserving

Strähle:
Sustainable products

Resource-saving use of materials
Building materials easy to separate for recycling purposes
Reusable components

Strähle specialises in partition walls with a holistic design philosophy. Modular structure and a wide range of options ensure flexibility in design combined with simple installation and removal. The systems fulfil contemporary demands made in terms of room acoustics, climate, light and organisation. The made-to-measure systems are intelligently constructed from top-quality materials and promise a long service life. Partition systems by Strähle enhance the quality of a room while permitting structures that are easy to change in the future.

ThyssenKrupp, Essen

The partition walls inside, with their black surrounds, echo the striking pattern of the façade. The result: an elegant interior-design statement.

Süddeutscher Verlag, Munich

Architecture:
GKK+Architekten, Prof. Swantje Kühn,
Oliver Kühn, Berlin

LEED gold-category certification,
the first office complex in Germany
to receive this award

SPIEGEL Medienhaus, HafenCity Hamburg

Architecture:
Henning Larsen Architects,
Copenhagen

Prior gold-category environmental
label certification, HafenCity

Silvertower, Frankfurt am Main

Revitalisation of the building dating back
to 1980
